**RE: Approval of RCRA Facility Investigation Work Plan Addendum for the Boeing,
St. Louis, Missouri, Facility, Permit #: MOD000818963**

Dear Mr. Haake:

The Missouri Department of Natural Resources' (MDNR) Hazardous Waste Program (HWP) has reviewed the RCRA Facility Investigation (RFI) Work Plan Addendum dated March 16, 2000, and Boeing's response to the HWP's comments dated May 19, 2000, concerning the elements of this work plan as they relate to further investigation of Solid Waste Management Unit (SWMU) 17. The RFI Work Plan Addendum (incorporating the noted response to comments) adequately addresses Corrective Action Condition V.A. of the Part I Permit and is hereby approved.

The RFI Work Plan Addendum was prepared to address the HWP's comments dated January 18, 2000, concerning Boeing's draft RFI Report dated June 18, 1998. The RFI Work Plan Addendum supplements the previously-approved RFI Work Plan that was submitted to the HWP on November 24, 1997, and is designed to address further investigation of contaminant releases to soil and groundwater related to SWMU 17. As previously discussed with Boeing, MDNR expects that the field investigation component of the Work Plan Addendum will be implemented in accordance with the Quality Assurance/Health and Safety Plans which were previously-approved by the HWP as part of the original RFI Work Plan.

It is requested that Boeing notify MDNR and the U.S. Environmental Protection Agency (EPA) at least five (5) working days in advance of implementation of the planned investigation activities at SWMU 17 to allow MDNR and EPA the opportunity to observe such activities and/or split samples. If you have any questions concerning this approval, please feel free to contact Mr. Richard Nussbaum, P.E., R.G., of my staff, at (573) 751-3553.

Sincerely,

HAZARDOUS WASTE PROGRAM

Arthur H. Groner
